With more than fifteen years of experience as a Digital Designer, I have worked on projects from Product Design to Digital Marketing.

The last seven years I have specialized as a UX/UI Designer working for different companies in Spain, Scotland and Malta. I have learned that digital product is a discipline that I enjoy quite a lot, so I have moved to specialise as a digital product designer.

Now, I am looking for opportunities to put in practice what I have learned... and learn more. Ready to rock the roll !!

My Experience
